Summary

Database developer with many years of experience in developing reporting systems in various sectors of the economy. Experience in large Russian and international companies. I specialize in Microsoft products (MS SQL Server, SSAS, SSRS, SSIS, VS). Experience in team development on the KANBAN system using JIRA, GIT. I quickly master new software, establish communications, delve into the details. I work with great dedication.

Experience

Senior SQL Developer
open-broker

2021 December - 2023 March
Moscow

Work details:

Development of internal reporting for a brokerage company of the Russian Federation at the federal level (from the TOP 10). MS SQL Server, Jira, Git.
Development of procedures for the formation of data DWH, SSAS cubes, SSRS reports.
Remote work in a team using the Kanban methodology.
Development of SP, report layouts, measures in SSAS, ETL scripts.

Computer Training Center "Specialist" at Moscow State Technical University. Bauman

2013 April - 2013 April

Moscow

Database administration in MS SQL Server 2012

sertificate - Creating queries in MS SQL 2008 R2/2005 using Transact - SQL.

Computer Training Center "Specialist" at Moscow State Technical University. Bauman

2012 January - 2012 January

Moscow

Creating queries in MS SQL 2008 R2/2005 using Transact - SQL.

Additional information

I have extensive and successful experience in both large companies (FMCG distributors or a federal-scale banking group) and small ones (packaging production plant).
In small companies, I have experience in creating management reporting systems from scratch, both in terms of the database and the reporting forms themselves in the form of MS EXCEL, MS ACCESS.

Interests and Hobbies

I like to play chess, swim, walk, read books on self-development, business.
